SOFTWARE DEVELOPMENT EXPERIENCE

---

*Personal site with all projects, links and Github repositories at **www.tdar.dev***

- **Seattle Brewery Search** | *github.com/tdar31/seattle-brewery-search | www.seattlebrewerysearch.com*
    - Full stack web application that provides an interactive map that shows the locations of all the breweries in the greater Seattle area. The site uses the Google Maps API to generate the interactive map with custom markers for each brewery.
    - Utilized React for the frontend, MongoDB/Mongoose as the database/ORM, Express and the official Google Maps API.

- **Fyre.gg** | *github.com/tdar31/fyregg | www.fyre.gg*
    - Full stack web application that provides on demand and in-depth player and match statistics for the game League of Legends. Allows users to search for both profiles and specific matches with dynamic photos, tooltips of items, spells and calculations of relevant statistics just as Kill/Death ratio and Creep score.
    - Utilized React for the frontend, MongoDB/Mongoose as the database/ORM, Express and the official Riot Games API.
- **Margin Calculator** | *Code not publicly available*
    - While at MCN in my spare time I created a web based margin calculator to automate manually calculating the cost of exams/reviews with varying margins depending on price, state, medical specialty and duration spent on each report. Prior to deployment, my team invested over 40 hours per week on this margin calculation process. Post-deployment, my program was able to reduce this processing time to 8 hours per week. This tool signed over to the company, adopted company-wide and I had the opportunity to do code reviews with the senior dev team.
    - Utilized vanilla Javascript with HTML/CSS and Bootstrap.

Software Development Languages and Tools:

Languages	Frontend	Backend
Javascript, Java	HTML/CSS, React, React Native, Bootstrap, Bulma, Express, SASS, jQuery, Mocha+ Chai/Unit Testing, HandlebarsJS	Node, Ajax, JSON, MySQL+Sequelize, MongoDB+Mongoose

WORK EXPERIENCE

Microsoft via Aerotek Inc.   **Seattle, WA**
University Recruiting Operations Associate   *July 2018 – Present*
- Assist with data analytics, reporting and auditing for the University Recruiting department utilizing primarily Excel and PowerBI.
- Coordinate with program managers, hiring managers and the interview scheduling team to ensure that each teams university hiring needs are met primarily utilizing Microsoft internal hiring tools.

Medical Consultants Network (MCN)   **Seattle, WA**
Medical Scheduler   *October 2017 – July 2018*
- Main point of contact for insurance adjusters; clients include Liberty Mutual, Hartford Life, Cigna, Broadspire, Travelers, The Guardian Life, The Department of Labor and PQME's for the state of California.
- Coordinating anywhere from 30 to 40 different insurance claims a week which includes scheduling appointments, transportation services, negotiating prices, medical record delivery, billing and ensuring that patients attend appointments.
